The Dec.2013 Industrial Association Forum will feature a presentation by Mr. Scott Bourne, PE, a principal engineer at Weiss Associates on the Final Draft Industrial General Storm Water Permit. Approximately 10,000 industrial facilities in California discharge industrial storm water under the Industrial General Permit (IGP) issued by the State Water Resources Control board (SWCRB). Despite its intended 5-year permit renewal cycle, the SWRCB has not updated the IGP since 1997.

The SWRCB is now poised to adopt a final IGP in March 2014 which uses a combination of minimum Best Management Practices (BMP) advocated for by the regulated community and application of Numeric Action Levels (NAL) non-profits and other stakeholders assert that the permit must contain.
