12:00 Noon to 1:30 P.M.

The May 2014 Industrial Association Forum will feature a presentation by Chevron on their Modernization Project. This project will replace some of the refinery's oldest processing equipment with modern technology that is newer, safer and cleaner. The project objectives are to modernize, to competitively produce gasoline, diesel, jet fuel and lubricant base oils, ensure no net increase in criteria air pollutants and greenhouse gas emissions, and provide flexibility to refine crude oil blends and gas oils with higher sulfur content and to produce higher quality hydrogen.
